

Summer Work 2019 BTEC Health and Social Care

As an introduction to the subject you need to create a mini-booklet to give you an insight into a key area for your unit 1 exam.

There are six life stages:

- Birth and infancy – 0-2 years
- Early childhood – 3-8 years
- Adolescence – 9-18 years
- Early adulthood - 19-45 years
- Middle adulthood – 46-65 years
- Later adulthood – 65 years – plus

You need to research each life stage and describe to me the physical, intellectual, emotional and social characteristics that define each stage.

You should:

1. **Summarise the details you have found** into a booklet to showcase what you have learned.
2. Include **pictures** where appropriate.
3. Include studies where appropriate.

The information could be presented within a table format for example:-

	Physical	Intellectual	Emotional	Social
Birth and infancy				
Early childhood				
Adolescence				
Early adulthood				
Middle adulthood				
Late adulthood				

Or a booklet whereby each page is a life stage and that page is split into 4 sections.

Due date: First lesson after the summer holidays.
